

Pärnu Hariduskeskus, visit to the school in Estonia

Guðrún Árdís, Sigríður Anna og Sigríður

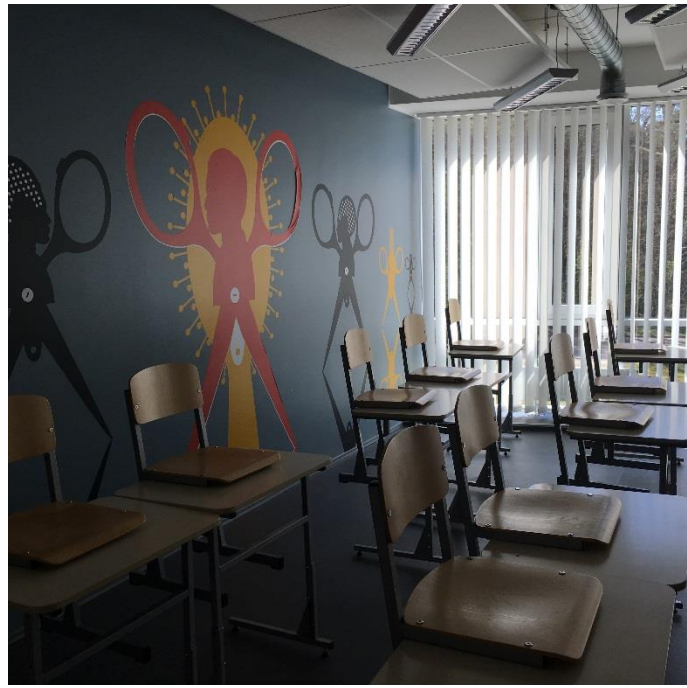

1. – 7.mai 2016

Teele gave a good lecture about Estonia, history of the country and various facts. We met also the department manager and we compare our schools with also three teachers from Denmark.

Teele walked with us around the school and showed us in all departments. It drew attention to how fun prominent markings were here and there around the school

All facilities at the school was very good

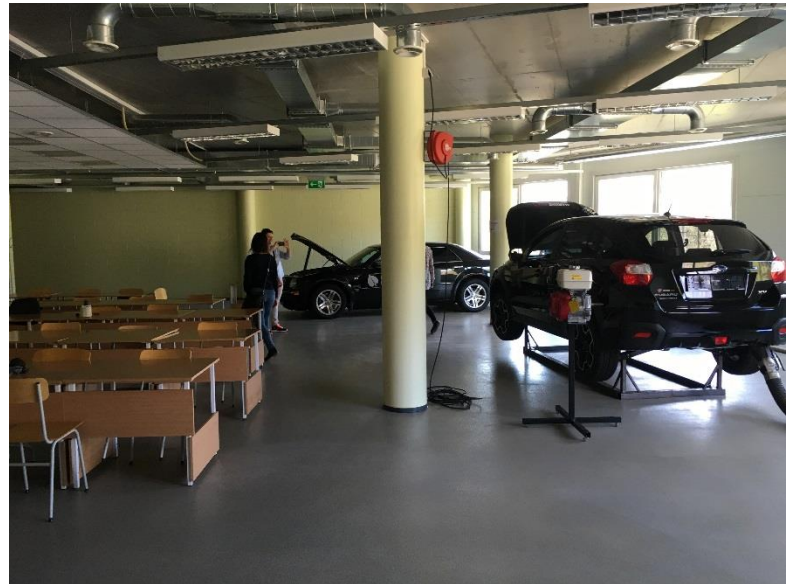

Touch screen with general information for students, where they can look up their schedules and other programs regarding their studies.

The cafeteria staff are students in training of their field.

The school is running popular hair salon where students can earn revenues for the school.

Car mechanics department were given new cars by the government.

In the carpenders department, they receive tasks from f.ex. kindergartens and earn money for school and able to meet the costs of the materials

paint department was interesting, we were wondering if it was idea to teach interior design again in FB, like it was taught before in textile department, just an idea.

Textile department has good industrial machines and proud teachers. The difference from our school in Iceland is that there they are more focused on the industry but we focus more on design and creativity. Our students mostly work on a home based sewing machines as most of them work by them self in their own studios as there are so few factories in this field in Iceland. It was great to see how they were in good connection with the industry. students were in training in some companies at the time we were there.

We got a brief introduction of adult education and evening school. Main difference is that they offer short courses with good connection to the industry. They also have a great cooperation with unemployed persons.

This was at a restaurant at the school that is operated by students training in the restaurant field. They are both practising in cooking and service.

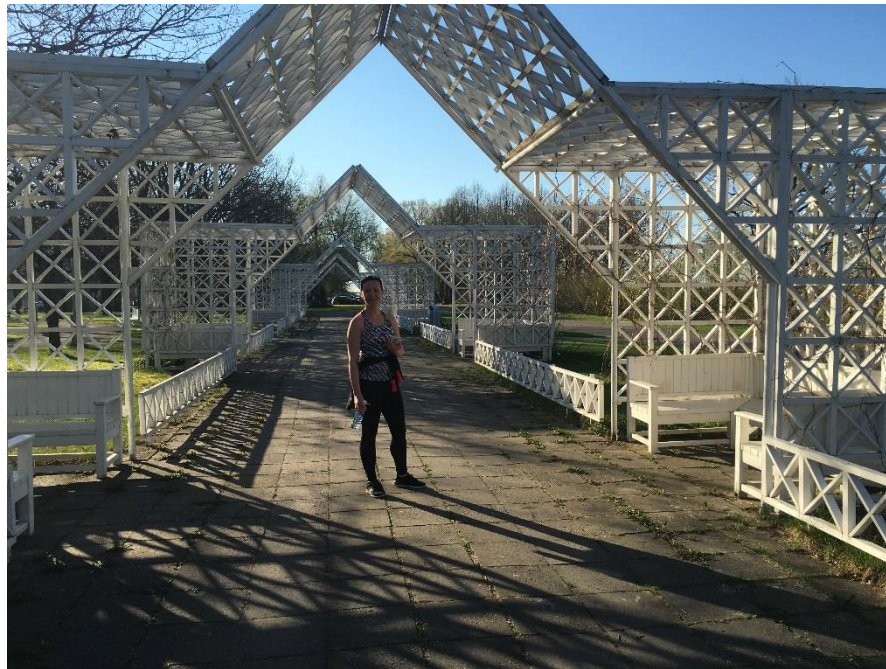

Inspiring hiking in Estonia nature

We were extremely satisfied with the lovely hotels we stayed in and got to see the Spa culture that Pärnu is famous for. The water was unbelievably nice for this time of year as people of Pärnu told us. It made the stay even more enjoyable.

Company visit

We visited the Pärnu small business incubator. He gave us us very informative lecture of their program. For example the Idea lab and the start up company Shipitwise.

www.startupestonia.ee

Company visit where we could meet the artist at work as well as buying their products.

Company visit – the hat factory of Wigen's. Great idea were they embroider the students name in their graduation hat, an idea we like to bring to our school.

Visit to Pärnu theater

Visit to Pärnu theater - more

There were two students from the Hairiduskeskus in work training. They were exchange students from Tenerife.

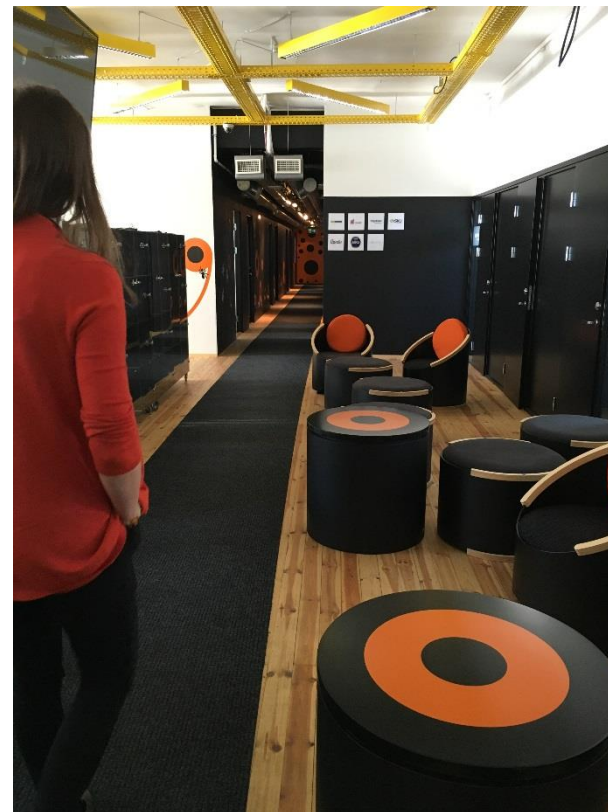

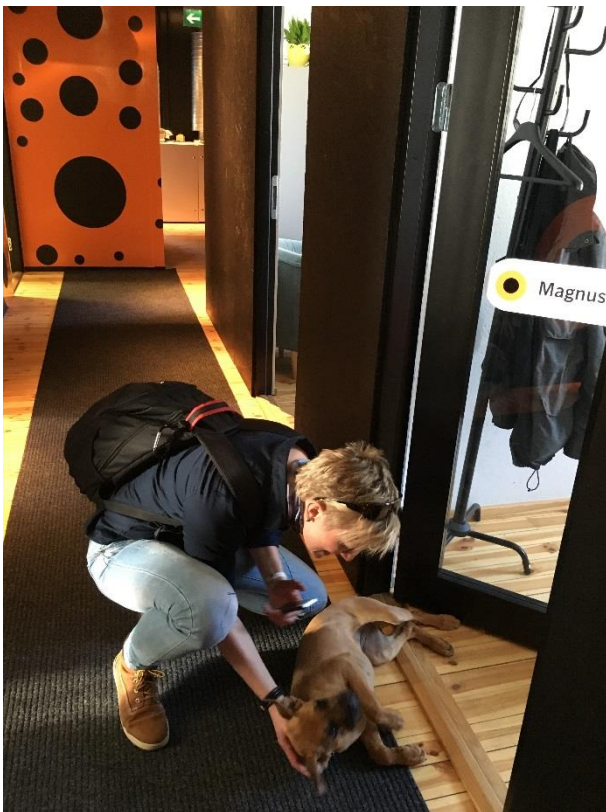

It was interesting to see the drawings from the textile designer and also this poster of employees, the shadows show what they do.

Creative incubator in Tallin. It was interesting to see designers and start up companies in their workplace. There they got all support they need for starting their companies. It was also inspiring to see how everything was thought through, from a logo on the wall to the whole building. This is a similar concept as The innovation centre in Iceland

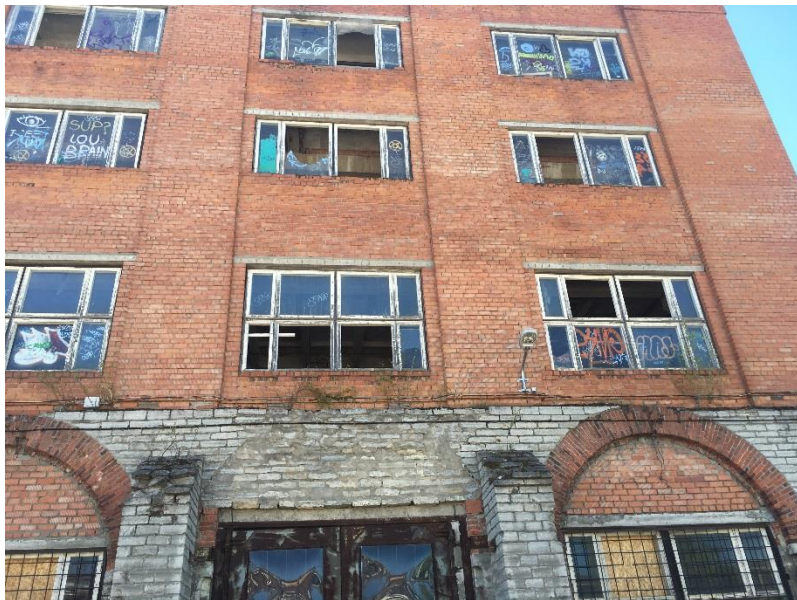

Telliskivi creative city

What a great idea and concept! That young man introducing this community gave us all such a great inspiration with his enthusiastic introduction. The community is all his idea and he has worked hard to get it to reality. Now there are hundreds of tenants staying there as well as pop up shops and restaurants. But what we liked the most was the whole idea about the healthy living and great atmosphere that was all around.

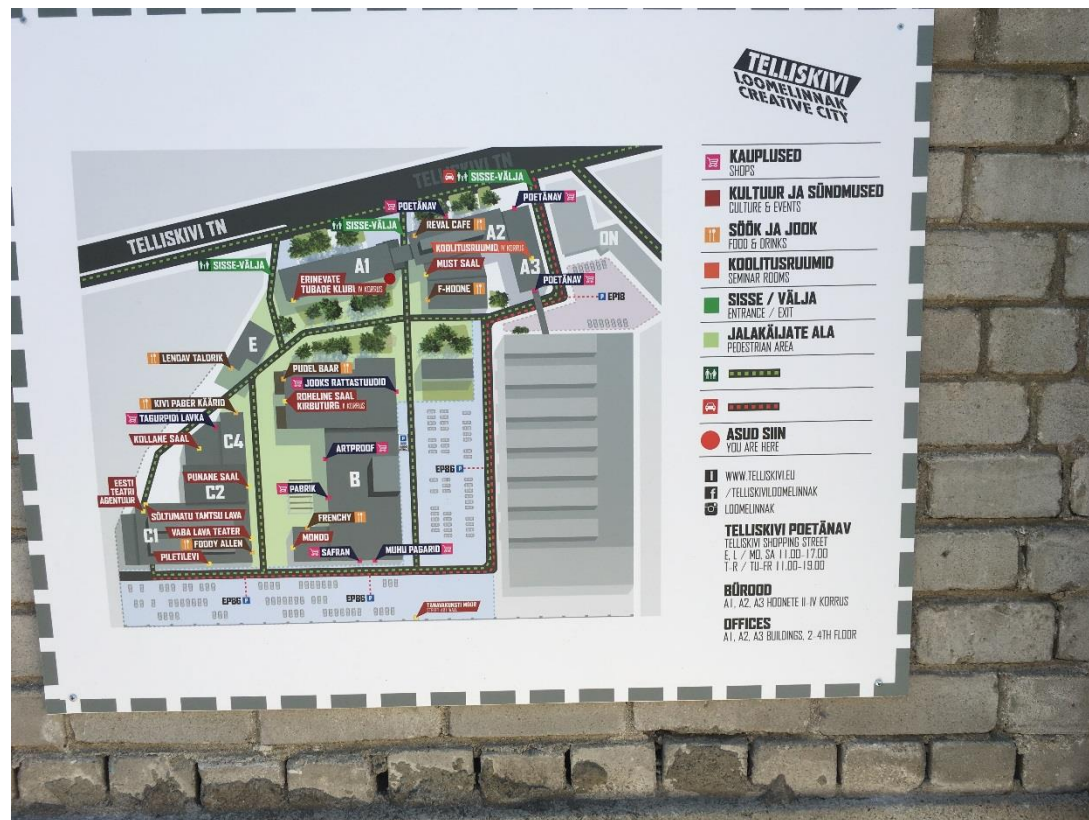

More pictures from Talliskivi – old fashion bakeri, buildings plan and shops

... and some more from Telliskivi

The old town in Tallin

A cultural day in Tallin were we were inspired by the beautiful Old Town

The food experience

The food in Estonia is amazing and we got a great dinner every night in a different restaurants that were obviously chosen by care. The course that was most surprising was this dessert Tiramisu in a flowerpot.
